

## MORE THAN MEETS THE EYE

### NEW BREEDING FOR AUSTRALIA

Farmer and agronomist feedback supports international experience that Blue Gorilla is palatable and has excellent regrowth. Australian trials also support a higher than average dry matter content.

### BLUE GORILLA

*Mid maturity, dark blue-green forage rape.*

# BLUE GORILLA

Mid maturity,  
forage rape.

Are you an Australian farmer or retailer? Please be assured our mission is to minimise your risk and maximise your potential by supplying the best grain and forage varieties, seed quality, and customer service. You benefit from our unique combination of independence, flexibility, and a wide world of seeds through our Australian and international alliances. Importantly, you can trust AGF and the information in this guide because of our focus on evaluation, a long history in seed multiplication, in-house seed processing, a commitment to ethical marketing, and good people.

Growth habit showing Blue Gorilla's short and dense habit. LHS = Giant type rape, RHS = Blue Gorilla.

Blue Gorilla is a result of AGF's access to a Wide World of Seeds. Evaluation, along with farmer and agronomist feedback, has proven Blue Gorilla to be a great value forage rape. Blue Gorilla offers a package of higher than average dry matter content, high leaf:stem ratio, reduced early senescing compared to older varieties, good palatability, club root resistance and excellent regrowth.

- Released and evaluated in Australia since 2017
- Suited to use in multi species mixtures
- Palatable
- Strong regrowth provides feed over warm and cool seasons.

## SOWING TIPS

Sowing Rate: 3-4 kg/ha

Suggested Sowing Time: August to April

Time to first grazing: 10 to 12 weeks
